Mr. Doug Jensen
State of Utah
Dept. of Natural Resources
Division of Oil, Gas and Mining
PO Box 145801
Salt Lake City, UT 84114-5801

Dear Mr. Jensen:

Ref: ML 41981 Project, S/027/089 SMO

We would like to conduct a drill exploration program in the vicinity of our bulk sample site located in the West half of Section 2, T24S, R9W (please see enclosed map). We will be using our trailer mounted corporate drill for this project, and would like to start the project September 4, 2002. We propose to drill 10 diamond drill holes, approximately 100 ft. deep and no drill pads or road construction will be required for this project. We will use existing roads and jeep trails.

The water for the drilling will be taken from Coyote Springs and nearby ranches, and hauled by pickup truck to the drill site. Upon completion of drilling, the drill cuttings will be returned to the holes and the holes plugged by cement. Also, the site will be hand raked and reseeded prior to our departure this fall. I anticipate the program will take one month to complete.

Sincerely,
WORLD MINERALS INC.

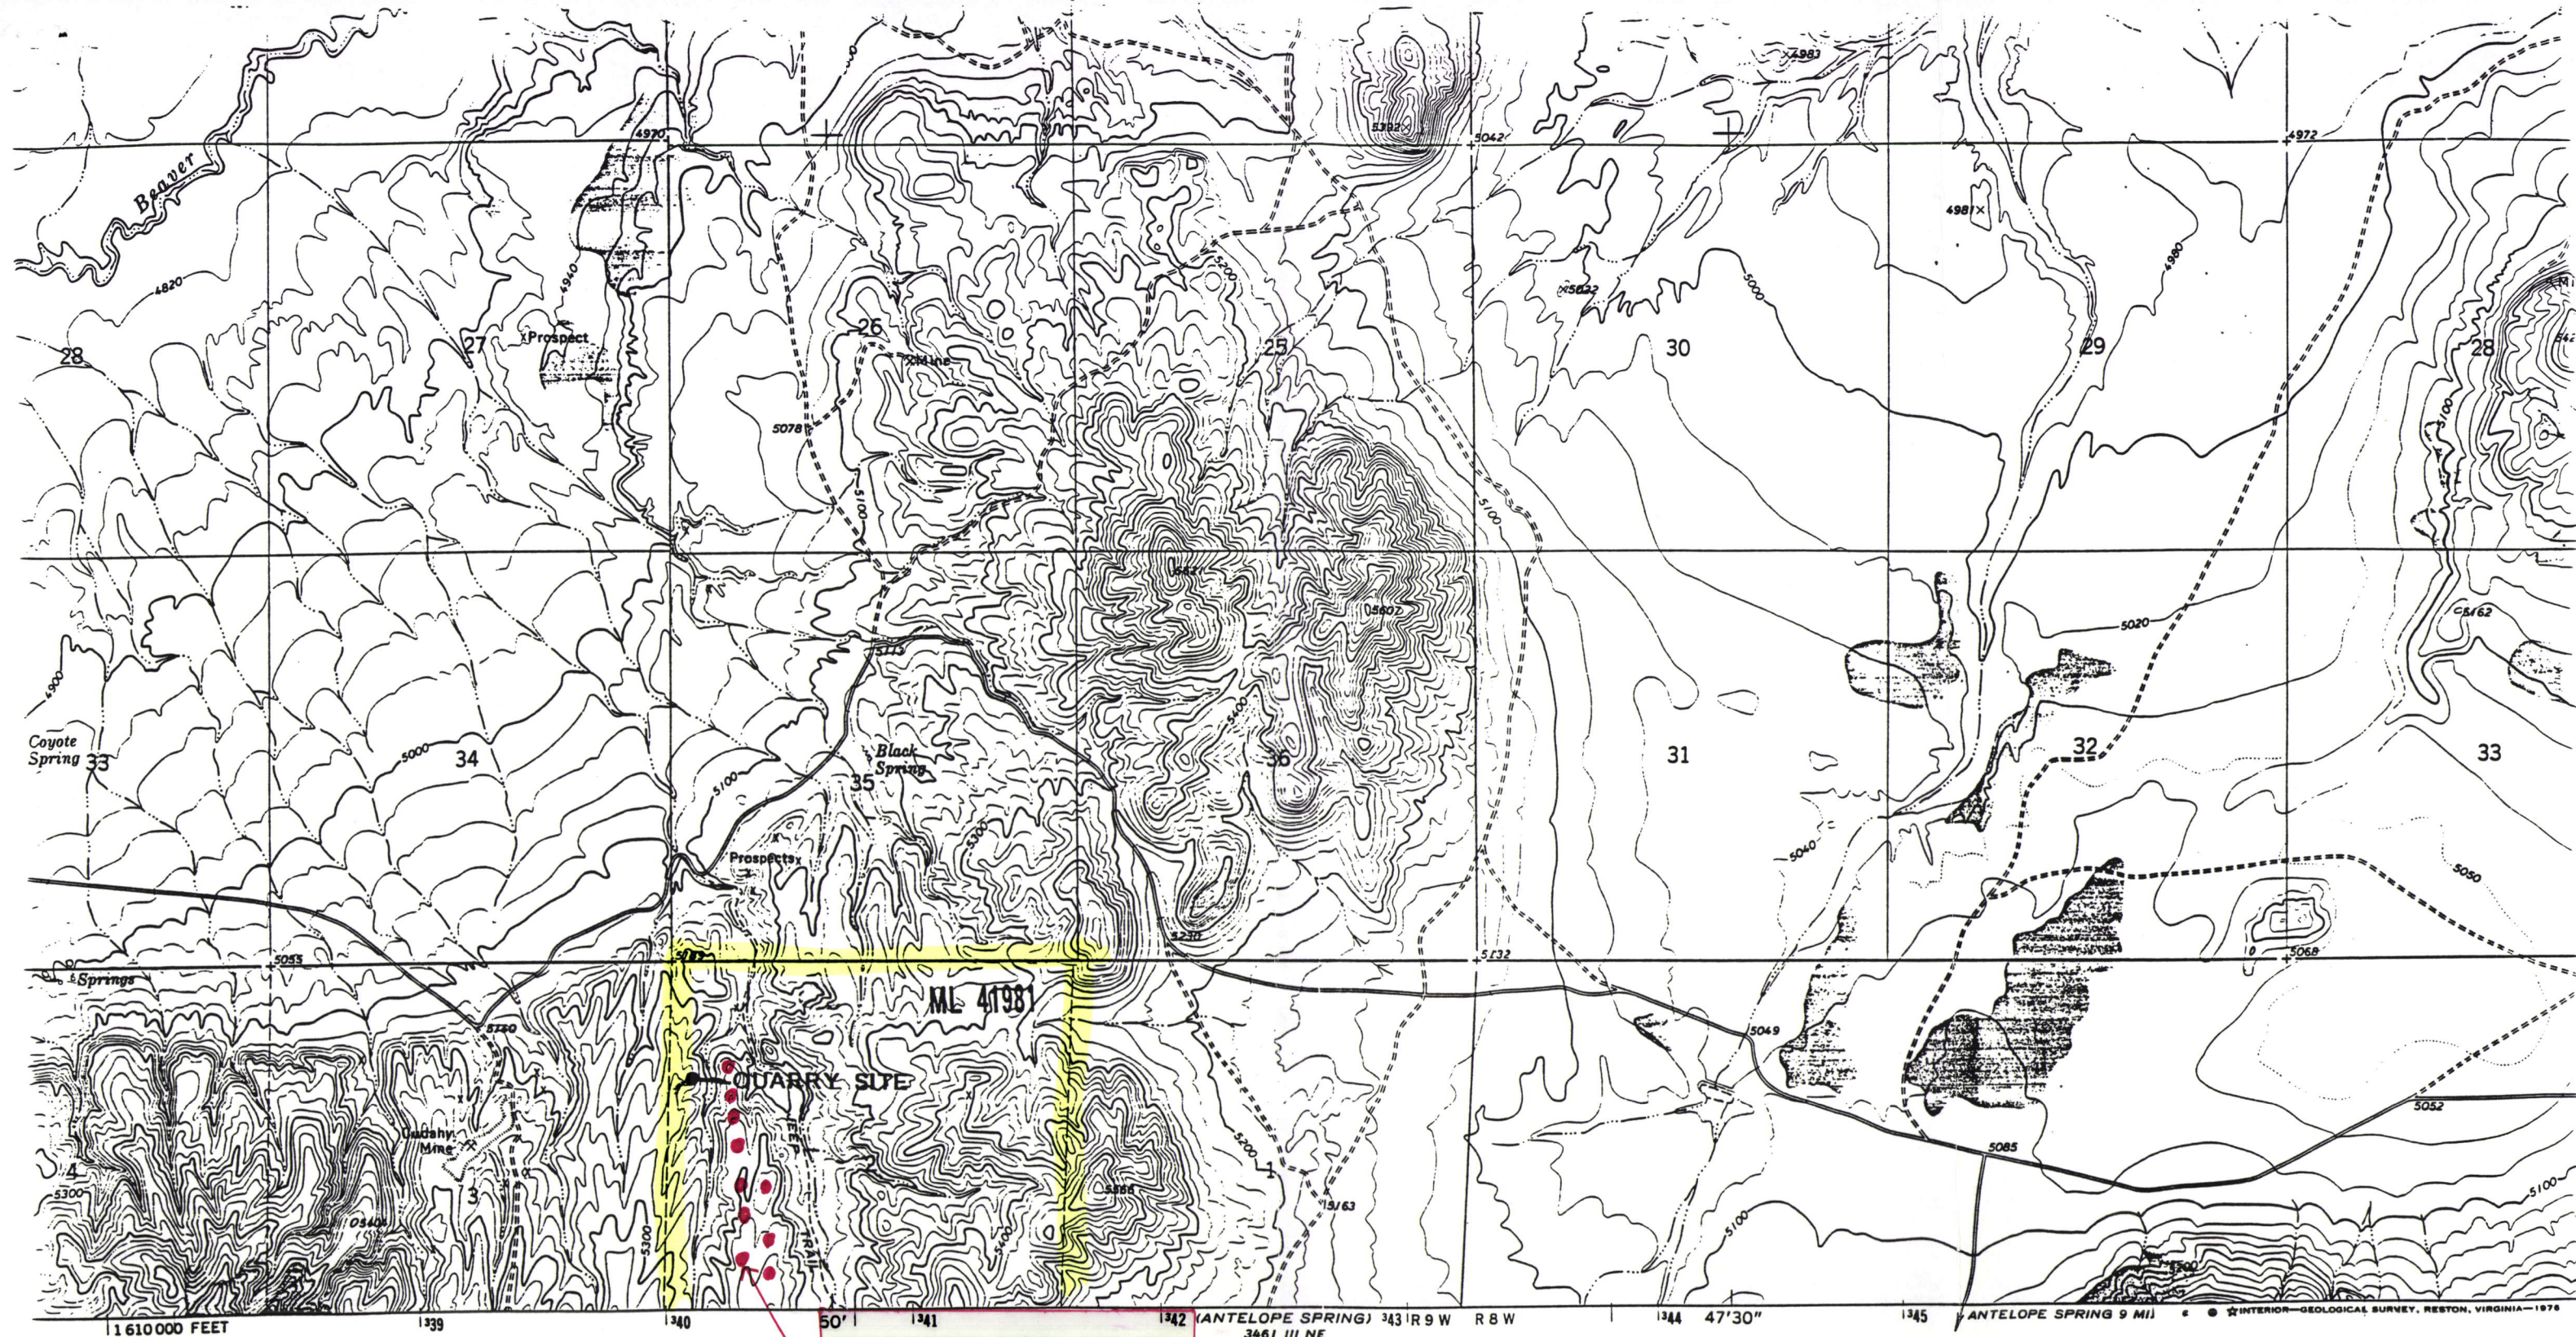

Joseph Levay
Chief Geologist
